Get tested and stop the spread of infection

Two types of test

**PCR test**

**Remember to take a PCR test if**
- you have symptoms of COVID-19
- you are a ‘close contact’ of someone who is infected with novel coronavirus.

You can book a PCR test on coronaprover.dk

**Quick test**

**It is a good idea to take a quick test when**
- you show up physically at your workplace or place of education
- you have been close to someone who is infected – for example at work, but you are not a ‘close contact’
- you are seeing someone who is at higher risk of severe illness from COVID-19
- you cannot avoid seeing many people.

Remember to take a follow-up PCR test if your quick test is positive.

You can take a quick test at different locations in your local area.
