Guidance for visitors

It is a good idea to get tested before your visit

Postpone your visit and self-isolate if you have symptoms, have tested positive or are a close contact of someone who is infected with novel coronavirus.

Wash your hands often or use hand sanitiser - and always when you arrive and before you leave.

Cough or sneeze into your sleeve - not your hands.

Do not shake hands, hug or kiss as a greeting.

Touch as few things as possible during your visit - for example table tops, door handles, etc.

Keep a safe distance to your relative, other residents, visitors, and the staff.
