Senest opdateret	7. februar 2013 (korrektur 9. juli 2013)

Baggrund	I Danmark findes ca. 200.000 mennesker med iskæmisk hjertesygdom. Hjertesygdom har udviklet sig fra primært at være en livstruende sygdom til også at være en kronisk sygdom, og behovet for hjerterehabilitering er dermed stigende. Formålet med rehabilitering er at forbedre patientens funktionsniveau, fjerne eller mindske aktivitetsrelaterede symptomer, minimere graden af invaliditet, og gøre det muligt for patienten at vende tilbage til en personligt tilfredsstillende rolle i samfundet (WHO). Hjerterehabilitering tilbydes både i sygehus- og kommunalt regi og inddeles typisk i tre faser En opgørelse fra 2010 viser, at blandt patienter, som var indlagt med svær hjertesygdom i 2009, fik kun 27 % tilbud om fuld hjerterehabilitering, og der var regionale forskelle på tilbuddene. En kortlægning af patientrettet forebyggelse fra 2011 viser endvidere forskelle på rehabiliteringsindsatsernes indhold og varighed på tværs af kommuner. Sundhedsstyrelsen igangsætter derfor et arbejde med udarbejdelse af en samlet national, tværfaglig og tværsektoriel klinisk retningslinje for hjerterehabilitering i Danmark. I denne sammenhæng afgrænses hjerterehabilitering fra sekundær profylakse (medikamentel behandling og risikofaktorkontrol), som ikke er tema for de aktuelle kliniske retningslinjer. Desuden afgrænses retningslinjen i udgangspunktet til fase 2 (uger til måneder umiddelbart efter udskrivelse) og eventuelt fase 3 (sen opfølgning og vedligeholdelse). Formålet med retningslinjen er at understøtte en indsats af ensartet høj kvalitet på tværs af landet, sammenhængende og hensigtsmæssige patientforløb samt vidensdeling på tværs af sektorer og faggrupper.
Problemstilling Fokuserede spørgsmål/ søgetermer	Engelsk: cardiac rehab, cardiac rehabilitation, cardiology, rehabilitation, CHD, Stroke, other Norsk: hjerte- og karsykdommer, retningslinje, Svensk: hjärt-kärsjukdomar, rehabilitering,
Inklusions- og eksklusionskriterier	Publikationstype: guidelines, meta-analyser, RCT eller systematiske reviews. Tidsafgrænsning: de sidste 10 år Population: voksne Sprog: engelsk, norsk, svensk og dansk

Nationella riktlinjer för hjärtsjukvård 2008 innehåller rekommendationer om åtgärder som hjärtsjukvården bör använda. Förebyggande åtgärder samt behandling av förmaksflimmer, hjärtinfarkt och hjärtsvikt är exempel på viktiga områden. Riktlinjen kompletterades år 2011 med ett antal nya rekommendationer, vilka finns samlade i en separat publikation.

Helsebiblioteket, Norge

Retningslinjer for forebygging, diagnostikk og behandling av hjerte- og karsykdommer: 4 fund

Nasjonal retningslinje

Diabetes – Forebygging, diagnostikk og behandling

Utgiver: Helsedirektoratet.

Målgruppe: Helsepersonell, Spesialisthelsetjenesten.

Innholdsbeskrivelse:

De nasjonale retningslinjene for forebygging, diagnostikk og behandling av diabetes omhandler bl.a. følgende:

- Klassifikasjon, forekomst og forebygging
- Diagnostikk og utredning inkludert differensialdiagnostikk type 1-/type 2-diabetes og annen diabetes
- Kontrollrutiner, ansvarsfordeling og samarbeid mellom primær- og spesialisthelsetjenesten
- Pasientopplæring og pasientinformasjon ved nedsatt glukosetoleranse
- Behandling og komplikasjoner
- Diabetes hos barn og ungdom, diabetes og graviditet

Medikamentkapitlene er oppdatert i september **2011**.

Norsk.

2009

Nasjonal retningslinje

Forebygging - Nasjonale Retningslinjer for individuell primærforebygging av hjerte- og karsykdommer (PDF)

Utgiver: Helsedirektoratet.

Innholdsbeskrivelse:

Begrepet primærforebygging er reservert for tiltak rettet mot personer med forhøyet risiko uten klinisk kjent eller etablert hjerte- og karsykdom. Retningslinjene omhandler bl.a.:

- Kartlegging av samlet kardiovaskulær risiko inkludert "Risikotabell: 10-årsrisiko for kardiovaskulær død i %"
- Pasientgrupper som bør tilbys medikamentelle tiltak inkludert en prioriteringstabell
- Hjelp til røykeslutt og råd om endring av levevaner
- Rådgivning og kommunikasjon
- Medikamentelle tiltak, oppfølging, kontroller og behandlingsmål
- Effekt og kostnadseffektivitet av medikamentelle og ikke medikamentelle forebyggende tiltak

2009

Nasjonal retningslinje

Hjerneslag - Nasjonale retningslinjer for behandling og rehabilitering ved hjerneslag

Utgiver: Helsedirektoratet.

Målgruppe: Helsepersonell, Politikere, Ledere.

Innholdsbeskrivelse:

Anbefalingene i retningslinjen bygger på systematisk gjennomgang og kvalitetsvurdering av relevant litteratur samt arbeidsgruppens vurderinger. Den omhandler behandling i akutfasen, sekundærforebygging og rehabilitering ved hjerneinfarkt og intracerebral blødning hos voksne. Behandling av transitorisk iskemisk anfall (TIA) er også omtalt. Anbefalinger for organisering av en effektiv behandlingsskjede er beskrevet i et eget kapittel.

Norsk.

2010

Nasjonal retningslinje

Medfødt hjertelidelse - Retningslinjer for behandling av medfødt hjertelidelse hos voksne

Utgivere: European Society of Cardiology, Norsk Cardiologisk Selskap.

Målgruppe: Kardiologer, Allmennpraktikere, Leger.

Innholdsbeskrivelse:

Retningslinjen gir anvisninger for oppfølging av voksne med medfødte hjertefeil. Det gis et godt grunnlag for planlegging av kompetanseoppbygging og kapasitetsbehov. Kvalitetsutvalget i Norsk Cardiologisk Selskap (NCS) har anbefalt at NCS gir sin tilslutning til de europeiske retningslinjene, og at disse vurderes i lys av nasjonale geografiske og befolkningsmessige forutsetninger.

Se hele vurderingen i relaterte lenker.
